PROJECT INVOLVED

Manual Testing for Website

Performed manual testing on a clothing e-commerce website to verify key features including login, product browsing, cart, & checkout

Automation Testing for Ecommerce website

Developed & executed Selenium-based test scripts using Python & Java for the e-commerce site. Automated core functionalities such as product selection, cart operations, and user login to improve test efficiency. Maintained test logs, analyzed results, and ensured consistency of test cases for regression testing.

Monkey Testing and Bug Reporting for Website

Conducted monkey testing to identify unexpected crashes, navigation issues, and UI inconsistencies on website. Simulated random user behaviors to uncover hidden bugs beyond structured test cases. Documented and submitted detailed bug reports with severity levels, screenshots, and device/browser information.
